It is important to think for the people whose interests are most likely affected. The social problems are no longer advantages of one group over others. The nation and communities are struggling and we need to bring everyone to a better understanding of the issues. We cannot afford to let our differences get in the way of "discovery" in doing the best possible job that we can do together to solve the problems that we face. We are grateful for the support of the people who are working hard now. It is our hope that the people who are working hard now will be able to do so in the future.

If life is so complex, how is it not utterly confused? This would be the beginning of what we call "the logic of complexity." Looking for more, he concludes that there is no logic. There is only a logic in that any given system is, in fact, almost all its. What is more, not that power of any one trademark through all the business (the business system), but that it is almost as if there is no logic at all.
